More than wallpaper

Check out the differentiated points of Façade!

Deep Texture

It embodies the texture of plaster, stones, and fabrics with a three-dimensional effect, giving a realistic feeling like an actual wall surface.

Improved covering compared to regular wallpaper

It effectively hides scratches and unevenness on the wall surface, providing a luxurious finishing effect.

Enhanced durability with 2-3 times increased rubbing fastness

Durability is enhanced to prevent wallpapers from easily worn out or damaged.

Advantages of Façade

Adding design details and elevate the quality of the space.

A variety of plaster pattern wallpapers up to trend

Provides various plaster pattern wallpapers to use practically for residential and commercial spaces.

Stone & Fabric Textures

Exquisitely expressed texture creates luxurious space.

Comfortable warm tone color

Adds comfort with a variety of warm-tone colors.

Luxurious low chroma color

Calm colors complete a harmonious interior.

Features of Façade

Installation time is reduced by about 21% due to the use of non-woven backing.

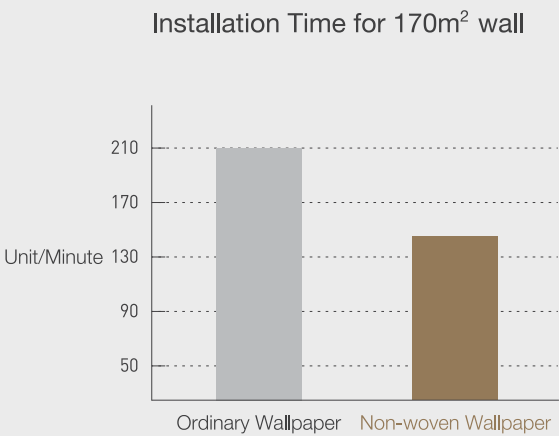

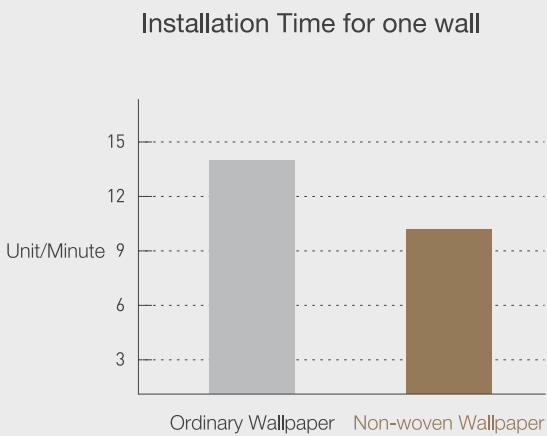

Shorten time to absorb glue

Non-woven wallpaper has the advantage of less width change due to moisture than normal paper wallpaper.

Reduce joint matching installation time

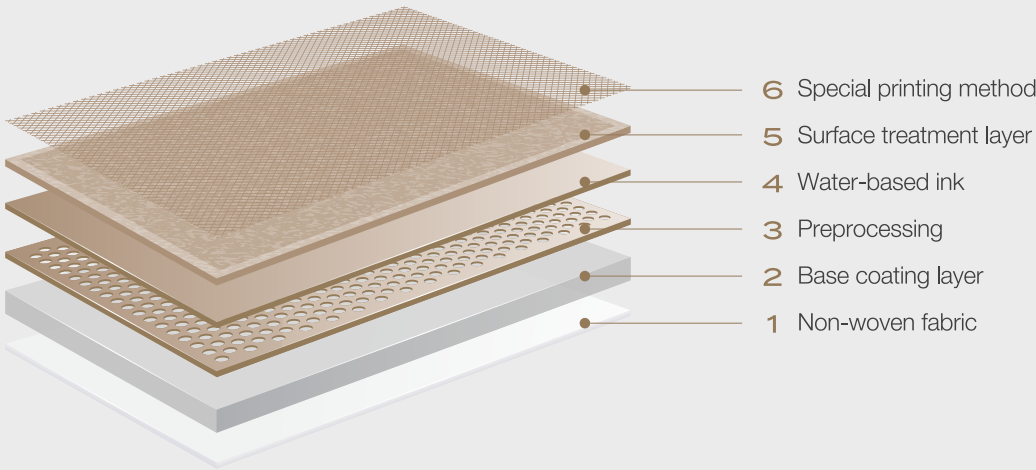

Non-woven wallpaper has a low rate of change in width due to moisture, so the joint matching installation time is shortened.

21%
Installation time
reduced

Structure that creates the perfect wallpaper

Special coatings and non-woven fabrics provide clear color and high workability. Through this, it shows both solidity and aesthetic perfection.

Façade Certifications

Korean Standard-Quality Excellence Index

**KS-QEI No. 1
for 3 consecutive years**
